

Community and Environmental Resources

Promoting environmental and public health, building resilience, increasing sustainability, and improving the quality of life for small and rural communities.

About RCAP Solutions

RCAP Solutions is the Northeast and Caribbean affiliate of the Rural Community Assistance Partnership (RCAP), a national network of regional non-profit organizations that provide comprehensive, on-site technical assistance and training to help small, rural communities address their drinking water, wastewater, stormwater, and other community development needs.

Our mission is to foster personal and public self-reliance and improve the quality of life for individuals, families, and the communities in which they live.

No-Cost Technical Assistance for Rural Water and Wastewater Systems

RCAP Solutions assists small drinking water and wastewater utilities, rural communities, and individuals in finding solutions to their infrastructure needs. We work to build financial, managerial, and technical operational capacity in rural and tribal communities.

Our efforts have helped communities access millions of dollars in grants and loans and trained thousands of individuals through customized on-site technical assistance and workshops. Our professional staff are committed to the strength and vitality of rural America and are available to assist with the extensive and intricate challenges infrastructure development can bring.
